

Did you know the B.R.I.D.G.E. TO DATA® team assists with database-related projects?

"The B.R.I.D.G.E. TO DATA team did an excellent job for our organization profiling over 400 real-world databases and enabled us to identify a select few that best met our research criteria. We could not have done this work as effectively and efficiently on our own without BTD; the team was experienced and professional throughout the engagement. I highly recommend them for any organization needing to identify the best database for its research project."

- Joseph Rolley, MS

Chair, Wound Care Collaborative Community RWE Group, Pennsylvania, USA

We Can Help Identify the Perfect Database & Acquire Data

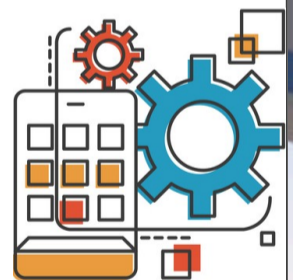

- ▶ Identify data sources and KOLs for a specific therapeutic area
- ▶ Assess study feasibility based on your study's unique criteria
- ▶ Communicate with data vendors & facilitate data access
- ▶ Assist with manuscript development of database landscaping studies

[View Our List of Database Profiles](#)

We Can Develop Custom Database Repositories

- ▶ Develop searchable database repositories:
 - Based on specific therapeutic area
 - Customized for your team by database attributes of interest
- ▶ Help integrate the repository into your company server
