

Read our Article in the *Wounds* Journal

We're excited to share our latest publication, which we co-authored along with the Wound Care Collaborative Community, "**Comprehensive Landscape Analysis for Usable Real-World Wound Care Data.**" Featured in the journal *WOUNDS*, this article delves into the intricacies of wound care data, offering an in-depth analysis on the challenges of finding real-world data for natural history of disease studies. *See how our team at DGI provided a productive solution which can also be used in other fields facing similar real-world data challenges.*

In this comprehensive study, we explore:

- Current Landscape: A deep dive into the detailed attributes of chronic wound care data and the challenges in finding real-world data sources.
- Data Utilization: Innovative ways to identify real-world data sources that accurately reflect the clinically complex profiles of chronic wound care patients.
- Future Directions: Predictions and recommendations for next steps in chronic wound care natural history of disease studies.

We invite you to read the article and **share your thoughts.**

Reach out with any questions or to discuss the findings in more detail.
